Work Experience

Operations Security Specialist

SOC LLC

Oct 2017- Present

- Monitor incident and threat reporting, and appropriately call for deployment of the appropriate response team(s) such as Quick Response Force, Emergency Response Team and Explosive Ordnance Disposal.
- Operate communications equipment – monitor and relay radio traffic, effectively controlling the network. Communicate with entities outside of the network with a variety of voice and text-based communications technology including local cell phone, regional and global satellite phone, tactical military radio, and UHF/VHF radio.
- Prepare weekly and/or daily reports, as requested by supervisory chain-of-command.

Security Badge Technician

All Native Group

Dec 2016-Apr 2017

- Conducted bio-metric eye scan and electronic finger print scans on non-us citizens.
- Verify clearances for all applicants.
- Process applicants via DS Post Applicant Submission System (DSPASS), THOR, SAM and SOFEX badge issuance system.
- Oversee visitor access roster per Chief of Mission request.

Front Desk Security Assistant

ViaSat

Feb 2016-Dec 2016

- Monitor CCTV and alarms to prevent unauthorized access and take necessary actions in case of emergencies.
- Record visitor information using the Security Information & Management System.
- Check the perimeter of the buildings to ensure all doors and gates are properly secured.
- Respond to lab closures to verify the labs have been secured.

Field Radio Operator

United States Marine Corps

May 2008-May 2016

- Set up and tune radio equipment including antennas and power sources, establishing contact with distant stations; routinely change frequencies and cryptographic codes.
- Maintain station logs of transmissions for activities including security patrols, medevac, and situation reports inside the command operations center.
- Establish and maintain communication with ships, aircraft, fire teams, and other remote operations.
- Retain accountability of controlled cryptographic devices, directly contributing to organization's ability to successfully accomplish its mission.
